- ✓ The young flower stalks, the flowers, the corms - It's all edible!

**Allium 'Quattro' F1**

### **Technical Information:**

'Quattro' F1 plant grows up to 30 cm. Its flowers' maximum height is 90 cm. Fertilization needs are normal and the water requirements are ample. In the 1st season the plant is small and it is better not to harvest the leaves. In the 2nd year the strong roots create a large plant and the leaves can be harvested. Min. temperature for active growth is 12°C (54 °F) at night, 16°C (61 °F) at day time.

**Pot size:** 9-12 cm

**Sun exposure:** Sunny

**Hardiness zone (USA):** Zone 5

**Flowering time:** Summer

**Planting time:** All year round

**Crop time:** 25 weeks for saleable young plant,  
36 weeks for saleable flowering plant.

**Pinching:** No need, although frequent cutting will enhance re-growth.
